

Quick-Boy

Technical Data

Working radius	1.65 m to access any position on the workpiece without difficult shifting or repositioning
Carrier weight	Max. 6 kg to carry and to balance the stud welding gun weight
Order No.	92-40-142 for C 08/CA 08 92-40-140 for PAH-1

General Information

- Other working radius and carrier weight on request

Advantages

Features

- A rectangular seating of the stud welding gun reduces the scrap rate when welding with tip ignition
- Strength-saving working without getting tired
- Wide working range, large reach
- High process reliability
- Constantly good welding results

Description

- Parallel displacement for vertical positioning of the stud welding gun
- Smooth-running guidance without jerks
- Freely movable arm
- Fixation of the welding cable
- Easy fastening to the welding table
- Integrated seat of the stud welding gun
- Light weight construction

Suitable stud welding guns

- Manual stud welding guns C 08/CA 08
- Automatic stud welding gun PAH-1
